NIGP Trainings in Raleigh The Division of Purchase & Contract is committed to providing training opportunities to strengthen the knowledge and expertise of procurement professionals. In their continuous effort, P&C has partnered with the National Institute of Governmental Purchasing Inc. (NIGP) – The Institute for Public Procurement – to offer procurement training opportunities at a reduced cost. All classes will be held in Raleigh and will be offered at the NIGP membership rate – a cost savings of \$200 for 3-day classes!

In order to register for a training, please access the [NIGP registration page](#). Once you are on the registration page, type “NC” in the search field within the ‘**Search Upcoming Courses**’ box.

For registration assistance please contact NIGP at (800) 367-6447.

Tips & Tricks: Applying Personal Labels Each user within NC E-Procurement has access to labels. These labels can be used to organize eRequisitions, purchase orders, and other approvable. Each user has a default label of ‘**Archive Items,**’ and has the ability to create more labels to identify and sort their approvable. It is important, however, to keep in mind that while labels can be a very useful tool for organizing and locating items within NC E-Procurement, most times a system search will be more effective and efficient at pulling back information. Labels should be used sparingly, if possible, and only in situations where a system search will not do the job.

A user should apply a label to an item when it is something that they need to access quickly but may not be able to share a common search field with the other items that are in the same label. *If any common searchable characteristic, such as when a supplier or time frame is shared, system searches should be utilized.* One example would be requisitions or purchase orders that are recurring monthly for which one requisition may serve as a template. Labels are also a good way to group together approvable that are all related to the same event or project such as requisitions relating to a new building project. In this situation, the items do not have a common characteristic other than the fact that they all are related to the same event.

1. From the Summary Tab of a selected approvable, click **'Apply Label.'**
2. The **'Apply Label'** options will appear. If you have not previously created any labels, only **'Archive Items'** and **'New Label'** will appear as options.
3. To assign the item to the **'Archive Items'** label, click the **'Archive Items'** option.
4. To create a new label and assign the item to it, click **'New Label.'**

The screenshot shows the 'Summary' tab for request RQ19493175 - Fence Rebuild. A yellow callout box with the text 'On the Summary Tab, click 'Apply Label' and then 'New Label.' has arrows pointing to the 'Apply Label' button and the 'New Label' option in the dropdown menu. The 'My Labels' section shows 'Apply Label', 'Add Label', 'Archive Items', 'New Label', and 'Remove Label' options. Below this is a table of line items with one item: 'Fence Rebuild' with a quantity of 1, unit 'each', and a price of \$615.25000 USD. The total cost is also \$615.25000 USD.

5. Once **'New Label'** is selected, an **'Add Label'** pop-up window will appear.
6. Enter the label name in the **'Enter New Label'** field.
7. Click **'OK.'**

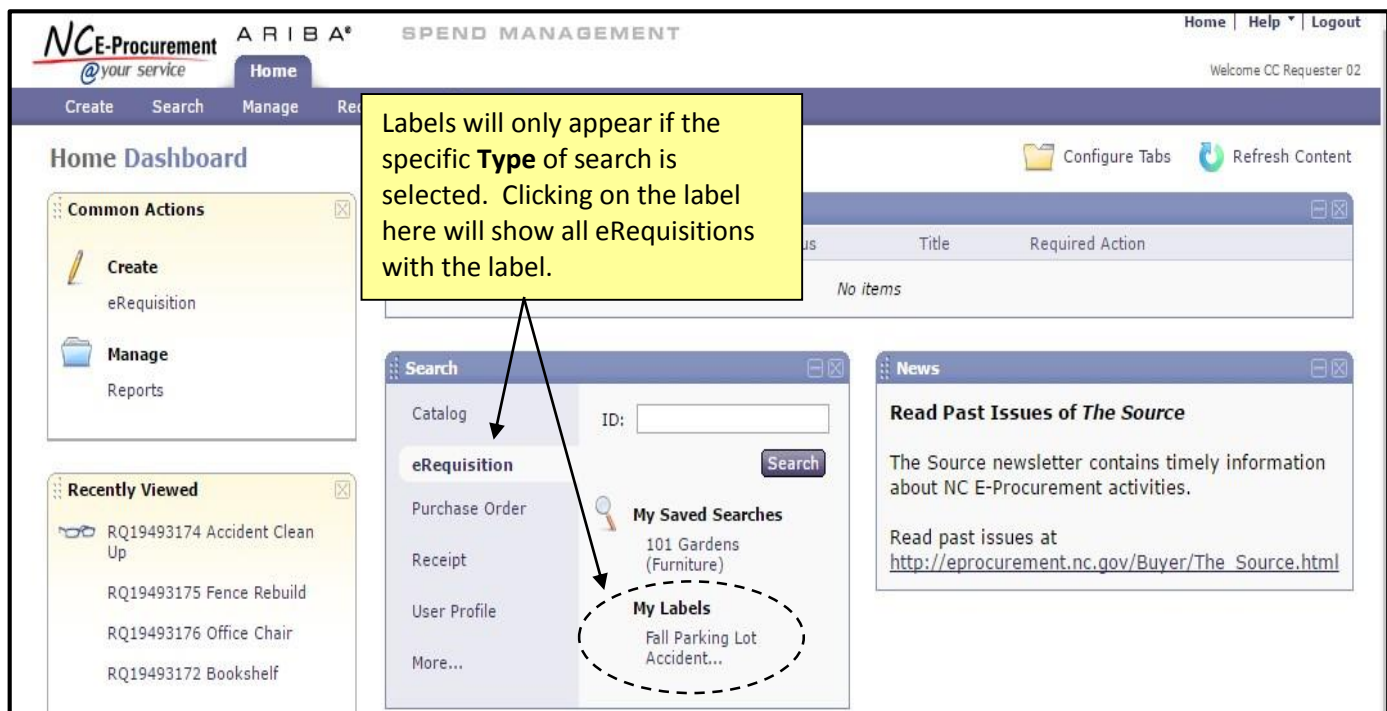

Note: Multiple labels can be added to the same approvable by following the same process described above. Additionally, the same label can be added to ANY approvable type. For example, an eRequisition and a purchase order can have the same label.

The screenshot shows the 'Add Label' pop-up window over the same 'Fence Rebuild' request. A yellow callout box with the text 'Name your new label and click 'OK.' has an arrow pointing to the 'Enter New Label' text input field, which contains the text 'Fall Parking Lot Accident'. The 'OK' button is circled in red. The background shows the same line item table as the previous screenshot.

From the Ariba Dashboard, labels that have been assigned to approvables can be used to locate all items with the specific label assigned to them.

8. For a search for approvables to which a label has been applied, the label will appear in the **'Search'** Portlet on the Ariba Dashboard.
9. Select the approvable type that you would like to locate by its label.
10. If a label is available, it will appear once that search is selected.
11. Click on the label name to access items in the approvable type that have been assigned for the specific label.

Note: If you have assigned a label to more than one approvable type (e.g., eRequisitions and purchase orders) you will have to go to both the **'eRequisition'** and **'Purchase Order'** searches and click on the respective label name in order to view the items. If you are on the **'Purchase Order'** search and click on the desired label, any eRequisitions that have also been assigned this label will **NOT** appear.
