Modifying a Contract Workspace

Once a Contract Workspace (CW) has been **'Published,'** it can only be modified when a user with **'Project Owner'** capabilities initiates the **'Amendment'** process. Please note that **'Amendment'** within NC eProcurement Contracts should be understood as any of the four types of contract modifications available within the system and differs from the way in which the State defines "Amendment," usually referring to a document changing the terms of an original contract.

When users need to modify a CW, they will do so by creating an **'Amendment'** within the system. NC eProcurement Contracts supports multiple types of **'Amendments'** and most of them temporarily change the **'Status'** of the CW to **'Draft Amendment'** until the modification is finalized and the CW is once again **'Published'** to create a new version of the CW.

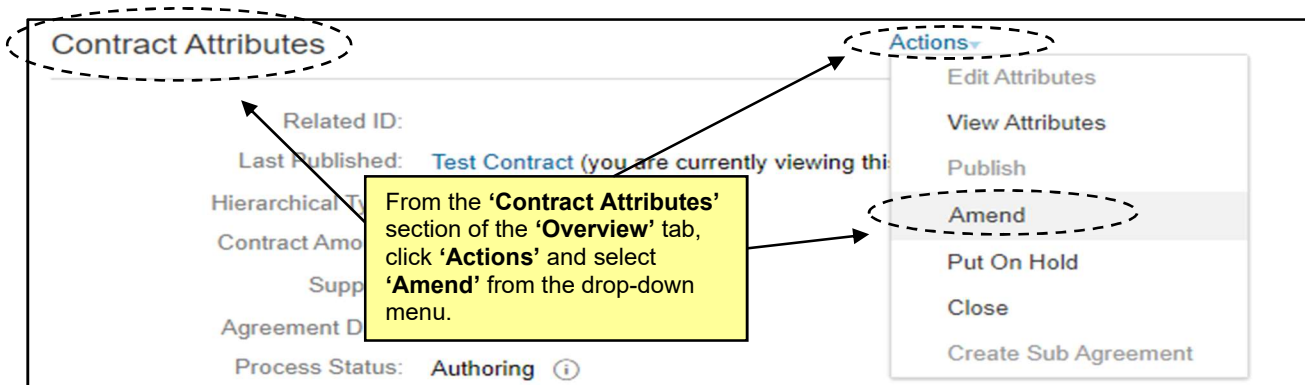

I. Types of 'Amendments'

There are four different types of **'Amendments'** available to **'Project Owners'** when they wish to modify a CW.

1. **'Administrative':** The most basic of CW modifications. This amendment allows the **'Project Owner'** to modify non-contract details such as adding a **'Team Member'** or uploading a supplemental document. No modifications are permitted to the actual contract or its terms. This **'Amendment'** type does not change the CW status to **'Draft Amendment,'** but rather it remains as **'Published.'**
2. **'Amendment':** Allows the **'Project Owner'** to modify any part of the CW such as the **'Commodity Code'** or the language of what the contract covers. Initiating this **'Amendment'** type will change the CW status to **'Draft Amendment'** and it will need to be **'Published'** again to reactivate.
3. **'Renewal':** Allows the **'Project Owner'** to modify the active dates of the contract, i.e., the **'Effective Date,'** **'Expiration Date,'** and any related reminder notifications in order to extend the life of a contract. Additional fields may also be editable in this **'Amendment.'** Initiating this **'Amendment'** type will change the CW status to **'Draft Amendment'** and it will need to be **'Published'** again to reactivate.
4. **'Termination':** Allows the **'Project Owner'** to modify the 'Expiration Date' to close a contract early due to an adverse condition or disagreement.

II. Initiating an 'Amendment'

1. On the **'Overview'** tab, scroll down to the **'Contract Attributes'** section and click **'Actions.'** From the ensuing drop-down menu, select **'Amend.'**

NC eProcurement

Modifying a Contract Workspace

- On the next page, select the **'Amendment Type'** from the drop-down menu, leave the **'Upgrade Template Version'** radio-button set to **'No,'** and add a comment regarding the reason for the **'Amendment.'** Click **'OK'** and the **'Overview'** tab will display.

Amendment Type: **Amendment** ▼ ⓘ

Upgrade Template Version: ☐ Renewal ☐ Amendment ☐ Administrative ☐ Termination

Amendment Reason Comment: *

Select the **'Amendment Type'** from the drop-down menu and enter a comment in the **'Amendment Reason Comment'** box.

III. 'Administrative Amendment'

An **'Administrative Amendment'** indicates a small administrative change and is limited in nature. The **'Contract Status'** of the Contract Workspace (CW) never changes from **'Published.'**

- Make any necessary changes on the **'Overview'** tab, add a **'Team Member,'** or load an additional supporting document.
- Return to the **'Overview'** tab (if the user had navigated away), scroll down to the **'Contract Attributes'** section, and click **'Actions.'** From the ensuing drop-down menu, select **'Complete Amendment.'** The CW is updated to a higher version, and it remained in **'Published'** status throughout.

Contract Attributes

Select **'Complete Amendment'** from the drop-down menu in the **'Contract Attributes'** section.

Actions: Edit Attributes, View Attributes, Publish, Amend, **Complete Amendment**, Put On Hold

Note the **'Amendment Type'** and **'Amendment Reason Comment'** from the previous page displays.

IV. 'Amendment Amendment'

An **'Amendment Amendment'** allows the **'Project Owner'** to change any part of the project, including the actual terms of the contract.

- After selecting **'Amendment Amendment,'** the **'Overview'** tab will display. The **'Status'** field will be listed as **'Draft Amendment'** and the **'Version'** field will be listed as **'v2 (editing)'** [or v3/4/5, etc., depending on what number the previous **'Version'** was].

Modifying a Contract Workspace

Note: While a CW is in a 'Status' of 'Draft Amendment,' all scheduled 'Expiration Notification' emails will be suspended until the modification is complete and the 'Status' goes back to 'Published.'

The screenshot shows the 'Overview' tab of a Contract Workspace. On the left, contract details are listed: Contract ID: CW7096, Contract Status: Draft Amendment, Version: v3 (editing), Owner: (blank), Test Project: No, Commodity: Catering services 9010160..., and Base Language: English. On the right, a 'Process' flow is shown with four phases: Phase 1 - Contract Creation (completed), Phase 2 - Contract Execution (completed), Phase 3 - Contract Management (in progress), and Phase 4 - Contract Modification (pending). A yellow callout box points to the 'Contract Status' and 'Version' fields, stating: 'Updates to the 'Contract Status' and 'Version' fields.'

- Once all requisite changes have been made and any new documents have been added, return to the 'Overview' tab, click 'Actions' in the 'Contract Attributes' section, and select 'Publish' from the drop-down. The CW will revert back to 'Published' status and cannot be edited again until another 'Amendment' is initiated.

The screenshot shows the 'Contract Attributes' section. A yellow callout box points to the 'Actions' dropdown menu, stating: 'Select 'Actions' from the drop-down menu in the 'Contract Attributes' section.' The dropdown menu is open, showing options: Edit Attributes, View Attributes, Publish (highlighted), Amend, Put On Hold, Close, and Create Sub Agreement.

V. 'Renewal Amendment'

A 'Renewal Amendment' allows the 'Project Owner' to change the active dates of the contract to extend it beyond its originally agreed-to 'Date of Expiration.'

- After selecting 'Renewal Amendment,' the 'Overview' tab will display. The 'Status' field will be listed as 'Draft Amendment' and the 'Version' field will be listed as 'v2 (editing)' [or v3/4/5, etc., depending on what number the previous 'Version' was].

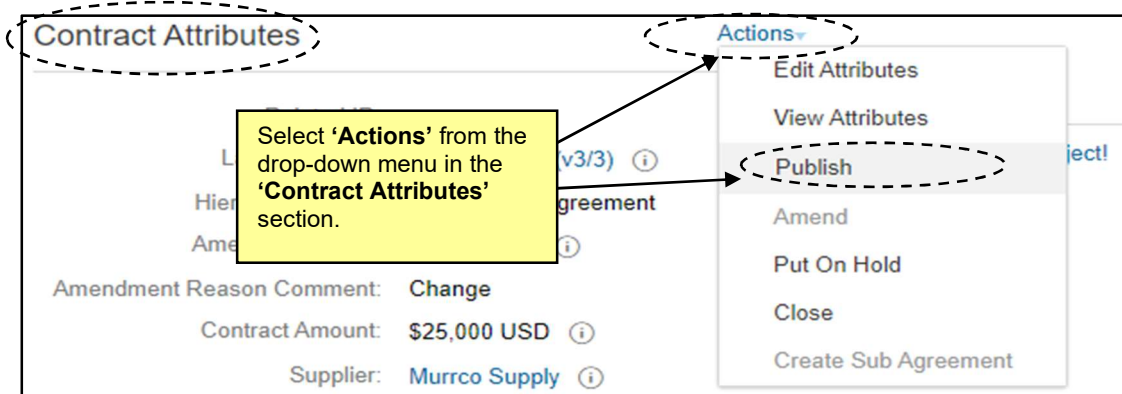

Note: While a CW is in a 'Status' of 'Draft Amendment,' all scheduled 'Expiration Notification' emails will be suspended until the modification is complete and the 'Status' goes back to 'Published.'

The screenshot shows the 'Overview' tab of a Contract Workspace after a 'Renewal Amendment' has been initiated. The contract details are: Contract ID: CW7096, Contract Status: Draft Amendment, Version: v3 (editing), Owner: Jeffrey Singer, Test Project: (blank), Commodity: Catering services 9010160..., and Base Language: English. The 'Process' flow is the same as in the previous screenshot. A yellow callout box points to the 'Contract Status' and 'Version' fields, stating: 'Updates to the 'Contract Status' and 'Version' fields.'

Modifying a Contract Workspace

- Once all requisite changes have been made, such as adjusting the expiration date, and any new documents have been added, return to the **'Overview'** tab, click **'Actions'** in the **'Contract Attributes'** section, and select **'Publish'** from the drop-down. The CW will revert back to **'Published'** status and cannot be edited again until another **'Amendment'** is initiated.

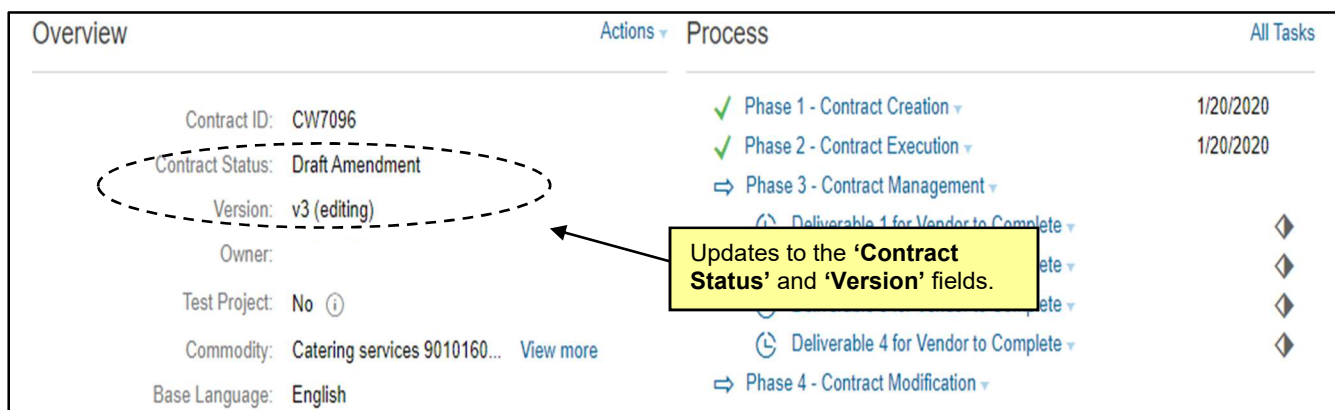

VI. 'Termination Amendment'

A **'Termination Amendment'** allows the **'Project Owner'** to close a contract before its originally agreed-to **'Date of Expiration'** in the event of an adverse condition or disagreement.

- After selecting **'Termination Amendment,'** the **'Overview'** tab will display. The **'Status'** field will be listed as **'Draft Amendment'** and the **'Version'** field will be listed as **'v2 (editing)'** [or v3/4/5, etc., depending on what number the previous **'Version'** was].

Note: While a CW is in a **'Status'** of **'Draft Amendment,'** all scheduled **'Expiration Notification'** emails will be suspended until the modification is complete and the **'Status'** goes back to **'Published.'**

2. Once all requisite changes have been made, such as adjusting the expiration date, and any new documents have been added, such as a scan of the certification receipt of the Termination Letter, return to the **'Overview'** tab, click **'Actions'** in the **'Contract Attributes'** section, and select **'Publish'** from the drop-down. The CW will revert back to **'Published'** status and cannot be edited again until another **'Amendment'** is initiated.

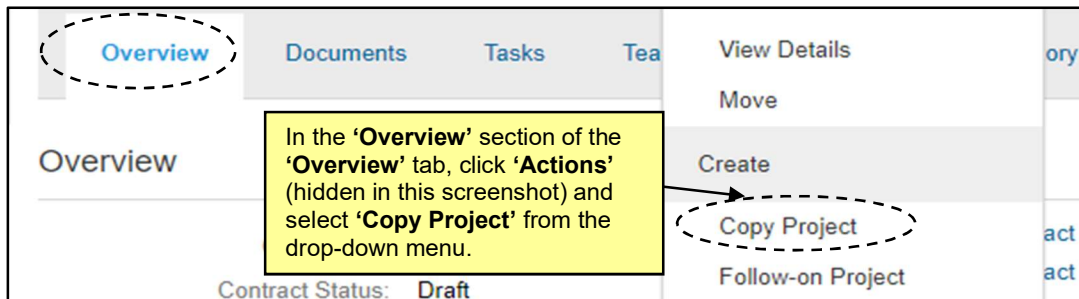

Note: CWs will not expire immediately. The system needs to refresh on the new **'Expiration Date'** before the **'Status'** updates from **'Published'** to **'Expired'**.

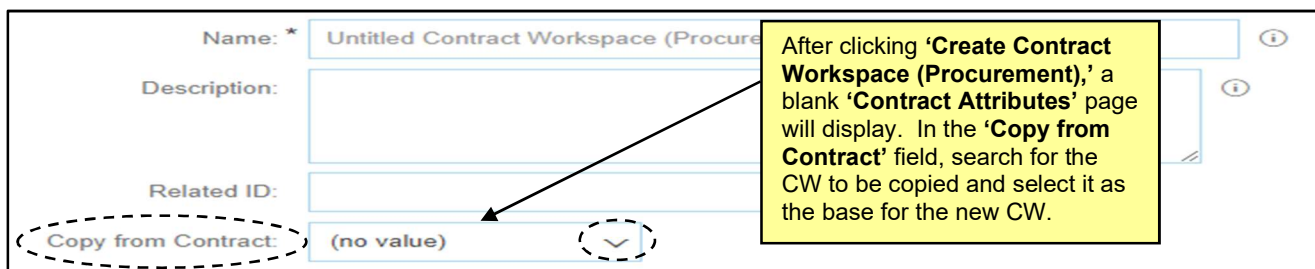

VII. Copying a Contract Workspace

When creating a new Contract Workspace (CW) that is similar to a previous CW, the **'Project Owner'** has the option to copy a previous CW.

1. There are two options to begin the process of copying a Contract Workspace:
 - a. On the **'Overview'** tab of an existing CW, click **'Actions'** in the **'Overview'** section and select **'Copy Project'** on the drop-down menu.

- b. Click **'Create Contract Workspace (Procurement)'** and a blank **'Contract Attributes'** page will display. In the **'Copy from Contract'** field, click the down-arrow to search for the previous CW to copy and click **'Select'** to use it as basis for the new CW.

NC eProcurement

Modifying a Contract Workspace

2. Certain **'Contract Attribute'** fields will auto-populate with information carried over from the CW that was copied, but not all fields. Notably, **'Name,' 'Description,' 'Test Project,' 'Agreement Date,'** and **'Expiration Date'** are required fields that will not auto-populate and must be manually entered before the **'Project Owner'** can click **'Create.'**
3. The **'Template'** type will auto-select based on the previous CW, but the **'Project Owner'** will have to answer the template questions again. Two additional questions will appear below the traditional template questions: **'Do you want to copy documents that were modified in the project being copied?'** and **'Do you want to copy project groups that were not in the template, from the project being copied?'** Both questions can be answered with either **'Yes'** or **'No'** from the drop-down menus. When all **'Contract Attribute'** fields are filled in and all questions are answered, click **'Create.'**

Note: An answer of **'Yes'** to the documents question will bring any documents or folders created in the original CW over to the new CW. The status of the copied documents will be **'Draft'** regardless of their status in the previous CW.

An answer of **'Yes'** to the project groups question will bring over any ad hoc groups or edited groups from the original CW, otherwise, only **'Template Project Groups'** as defined in the latest version of the **'Template'** will be carried over to the new **'Teams'** tab.

The screenshot shows a form with two questions, each with a 'Yes' button and a dropdown arrow:

- Do you want to copy documents that were modified in the project being copied?
- Do you want to copy project groups that were not in the template, from the project being copied?

Below these questions is a yellow callout box with the text: "Answer the two additional questions after the traditional template questions and click 'Create.'"

To the right of the callout box is a blue button labeled "Create" with a dashed oval around it. An arrow points from the callout box to the "Create" button.

4. The new CW will be created and assigned a unique **'ID number,'** and the user will be taken to the **'Overview'** tab from which they can begin to manage the rest of the CW, eventually putting it into **'Published'** status.

VIII. Managing Multi-Vendor Contract Workspaces

If a **'Project Owner'** needs to create and link multiple Contract Workspaces (CW) for one contract with multiple **'Suppliers,'** it is advised they use the **'Copy'** feature.

Note: It is advised to copy a CW once the **'Solicitation Documents'** have been loaded in the original CW but before any other supplier-specific documents have been loaded to the first CW. Assuming that one set of **'Solicitation Documents'** can be used for all **'Suppliers'** on the contract, these can be copied to each CW. The **'Project Owner'** will not want to bring the executed **'Contract Document'** from one **'Supplier'** over into a new CW for another **'Supplier,'** so complete each CW only once all root CWs have been copied and created for each **'Supplier.'**

1. Click **'Create Contract Workspace (Procurement)'** to create the initial CW.
2. Fill in all the **'Contract Attributes'** fields including the **'Statewide Contract ID'** field or **'Agency Contract ID'** field depending on the **'Contract Type.'**
3. Select the **'Template'** type and answer the template questions, then click **'Create.'**
4. Navigate to the **'Documents'** tab and load all relevant **'Solicitation Documents.'**

NC eProcurement

Modifying a Contract Workspace

5. At this point the CW is ready to be copied. Initiate the copy through one of the two options outlined above.
6. On the **'Contract Attributes'** page of the newly copied CW, populate all fields for which information did not auto-populate.
7. In the **'Supplier'** field, search for a different **'Supplier'** on this contract and replace the copied **'Supplier'** with that value.
8. Answer the template questions and select **'Yes'** to answer the question **'Do you want to copy documents that were modified in the project being copied?'** This will bring the **'Solicitation Documents'** over into the new CW. Click **'Create.'**
9. Repeat the process from this point as many times as there are unique **'Suppliers'** on the contract before executing any further **'Tasks'** on these linked CWs.
