Selecting Tiered Pricing Catalog Items

Please be advised that catalog items within NC E-Procurement for contract 645A contain tiered pricing, which means the the cost of a specific contract item depends on the total quantity purchased. When selecting a catalog item for contract 645A, please pay attention to the **'Description'** of the catalog item and select the item that corresponds to the total quantity being ordered.

Additionally, tiered pricing applies to the quantity of the entire eRequisition, not just a single line item. For example, if one line item has a quantity of 50 and another has a quantity of 25, the catalog items that reflect tiered pricing for a quantity of 75 should be selected for both line items.

Note: Although it is not an obligation of the vendor, be advised that the vendor may require a change order to be submitted in the event that the original purchase order contained invalid pricing based on the quantity purchased. Therefore, it is important to select the correct catalog item to receive the best price available.
