NC electronic Vendor Portal Searching for Vendors by Commodity Code (Agency App)

Procurement Users can generate a targeted list of vendors registered with a specific commodity code in the eVP Agency App via advanced filtering. That list will include the email address of each vendor's '**Primary Contact**' and can be exported to Excel.

I. Filtering Active Vendors by Commodity Code

1. From the 'Active Vendors' page (or any preferred custom view that includes the 'Email (Primary Contact)' field) in the 'Vendor Management' section, click on 'Edit filters'.

🔢 🚳 Admin App	,⊃ Search Q + ⊗ ? S

3. In the newly-visible '**Related entity**' field, click the down arrow to search for and select the '**Commodity Codes**' value under the '**Many to many**' section of the dropdown.

Note: Scroll directly down to the end of the list to find '**Commodity Codes**' a few values up from the bottom. There is another '**Commodity Codes** (**Commodity Codes**)' value visible near the top of the list, but that is not the correct value for this search.

5. In the **'Value'** box, begin typing a commodity description. A dropdown with available selections will display. Select the description of the commodity code or family to be included in the search.

Note: In this screenshot "jan" was typed, and commodity code descriptions including "janitorial" options displayed.
